

**Pre K-12 SCHOOLS COVID-19 SCREENING**  
**Staff, Students and Families**

In an effort to keep the school community as healthy as possible, students, parents, and staff are required to screen for symptoms and risk factors **daily** before boarding a bus and/or attend school. A list of symptoms and risk factor screening questions are provided below so you/your child can clearly identify what symptoms and risk factors warrant that you/your child needs to stay at home.

**1. Do you/your child have any of these symptoms?**

- Fever (100 F or greater)
- Chills
- Shortness of breath or difficulty breathing
- Headache
- New cough
- Fatigue
- Muscle or body aches
- New loss of taste or smell
- Sore throat
- Congestion or runny nose
- Nausea or vomiting
- Diarrhea

If you/your child have **any** of these symptoms, you/your child should stay home, stay away from other people, and you should call your health care provider.

**2. Have you/your child had close contact (within 6 feet for at least 15 minutes) in the last 14 days with someone suspected or confirmed to have COVID-19?**

- Yes > You/your child **cannot** board the bus or be at school. You/your child can return 14 days after the last time he/she had close contact with someone with COVID-19. You/your child should contact you/your child health care provider.
- No > You/your child can board the bus and/or be at school if your child is not experiencing symptoms (see #1).

**3. Have you/your child traveled in the prior 14 days outside of New Hampshire, Vermont, Maine, Massachusetts, Connecticut, or Rhode Island?**

- Yes > You/your child **cannot** board the bus or be at school. Your child can return to school when 14 days have passed since travel outside of New England.
- No > You/your child can board the bus and be at school if your child is not experiencing symptoms (see #1).

**Return to School: Please refer to a parents guide of when to stay home, get tested, and return**

*Thank you for working with us to keep our school community safe!*
