

District Goal 2: Instruction

Given that quality instruction is essential to student achievement, educators in the Laconia School District will regularly use a research and literacy based, agreed-upon instructional framework that allows for rationalization and engages students. By the end of the 2020-21 school year, this framework will be used by educators across the District. There will be a (number) percent increase in proficiency rates on state accountability assessments across the District and selected internal benchmark assessments.

Structures- In-service time, team time, faculty meetings, summer institutes, walk-throughs, evaluation, and committee work.
